DIAL INDICATOR – DIGITAL PIT GAUGE SYSTEMS

Western Plant & Pipeline Products would like to introduce the Tri-Weld Gauge from Western Instruments. Please feel free to contact us for more information on the gauges

## TRI-WELD GAUGE

The Tri-Weld Gauge provides easy to read measurements of the following welding and fit-up parameters:

- Internal Hi-Lo
- Gap
- Fillet Height
- Leg Length
- Weld Height
- Undercut Depth
- Misalignment
- Angle of Preparation.

The Tri-Weld Gauge is equipped with 3 separate scales for all measurements. Metric and Imperial (Thousands of an inch and fractions of an inch).

- Rules for liner measurements are located on the top and bottom of the Front side of the Scale Plate.
- The Tri-Weld Gauge is also equipped with 7 unique diameter comparators which are half circles in 1/16" to 1/2" in 1/16" increments (1.6mm to 12.7mm in 1.6mm increments) for convenient diameter estimates (Fillet Welds, Welding Rod/Wire, etc.)
