

Product Fact Sheet

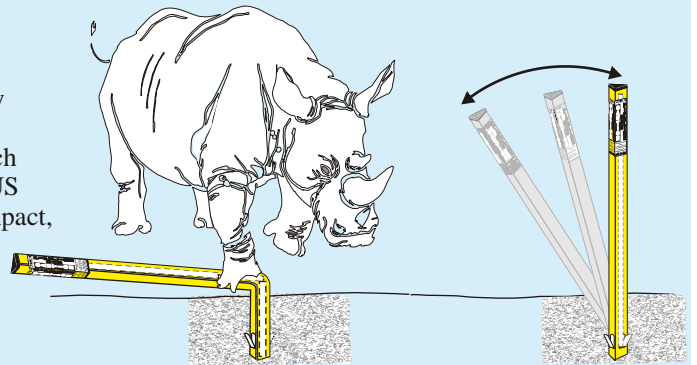

Rhino TriView PLUS™

100% Recyclable
*Rod not recyclable

Cattle and Wildlife Resistant

The Rhino TriView PLUS greatly reduces damage caused by cattle and wildlife. This unique post is designed with a flex-PLUS rod placed inside of our patented triangular post, which allows for maximum rebound capabilities. The TriView PLUS will help the post rebound from a direct hoof, paw, or tire impact, as well as wildlife or cattle directly leaning or scratching up against the post. Even in situations where cattle may sit on the post, bending it all the way to the ground, the TriView PLUS maximizes spring-back potential.

Not Limited to Rangeland and Wildlife

The versatile and flexible TriView PLUS not only stands up to wildlife, but direct impacts from vehicles as well. The TriView PLUS can withstand and rebound from multiple impacts from cars, ATVs, snowmobiles, off-road trucks, and motorcycles.

Easy Installation

The TriView PLUS can be installed via direct bury, or with a soil anchor.

1. Insert Flex-PLUS rod in hole/anchor

2. Insert TriView

Attach a sign when needed

The TriView PLUS provides extra support when you choose to use a RhinoPoly™ Sign.

The TriView PLUS offers the same great features as the original TriView™. Also available are the TriView PLUS Test Station and TriView PLUS with Soil Anchor.

360° Readability • UV Stable • Weather Resistance • Durable

TriView patents & patent pending: # 6,099,203 # 7,025,016 # D525721
