

Custom Printed Flags

Custom printed marking flags are used for temporary marking purposes. Utilities use them to locate underground lines. Construction companies use them to mark plots and for highway construction. Lawn care companies can mark sprinkler or irrigation systems. Custom printed flags can also be used for pesticide postings.

Installation Tools

Carrier Probes are available for placing flags in hard, rocky or frozen soil.

Flag Installation Tool

This sturdy tubular probe is perfect for placing flags in hard, rocky or frozen soil. The probe is designed to carry 100 flags in the handle for convenient installation.

The probe has a rubberized handle (not shown) to protect from underground electrical hazards. The probe is constructed of welded 3/4" (1.9 cm) steel tubing and includes a rubber covered steel handle, 4-3/4" (12.1cm) replaceable steel point, and foot step for added leverage. The point can be removed and reversed for safety when the probe is not in use.

The probe is 30" (76.2 cm) long and lasts a lifetime. Weight 4 lbs. (1.8 kg)
