

SafePurge Purge Stand

Safely purge gas away from buildings, overhangs and open cut trenches. Recommended as a safe way to purge distribution lines, by the American Gas Association.

Efficiently achieve safe purge heights of 7' to 11' high.

Tough/compact steel and aluminum construction with collapsible sections contained in one carrying case.

The SafePurge Purge Stand has an adjustable base for all types of terrain. The three adjustable legs can also extend for maximum stability.

The 12' flexible connection hose, with brass quick connects, allows you to maintain a safe operating distance. Extended lengths available in 12' sections.

Easily connect your portable gas detector, to the SafePurge Stand, with a ¼" hose to the barbed fitting.

Available in (3) standard sizes ¾", 1" and 2"

The SafePurge Purge Stand Kit Includes:

- Purge Stand Base
- (2) Aluminum Extensions
- Grounding Rod
- Safety Cones
- Carrying Case
